

PowerLift Doors Glass Requirements

PowerLift Doors requires that all glass, including windows and glass in walk doors, installed in PowerLift door products be treated as overhead glass and adhere to the following criteria:

1. **NON-INSULATED GLASS:** Minimum 1/4" thick glass consisting of two (2) panes of 1/8" thick tempered glass laminated with a 0.06" thick PVB or SGP interlayer
2. **INSULATED GLASS:**
Exterior pane: 1/4" thick annealed glass
Interior pane: 1/8" thick minimum tempered glass laminated with a 0.06" thick PVB or SGP interlayer
1/2" space between interior and exterior glass panes
